# Low-Maintenance Beauty

Requires an annual cleaning with a garden hose to keep it looking like freshly painted wood.

These products have been certified by Home Innovation Research Labs. This means you can be assured that these products comply with specific green practice criteria in the National Green Building Standard (NGBS). Visit [www.HomeInnovation.com/GreenProducts](http://www.HomeInnovation.com/GreenProducts) for more details.

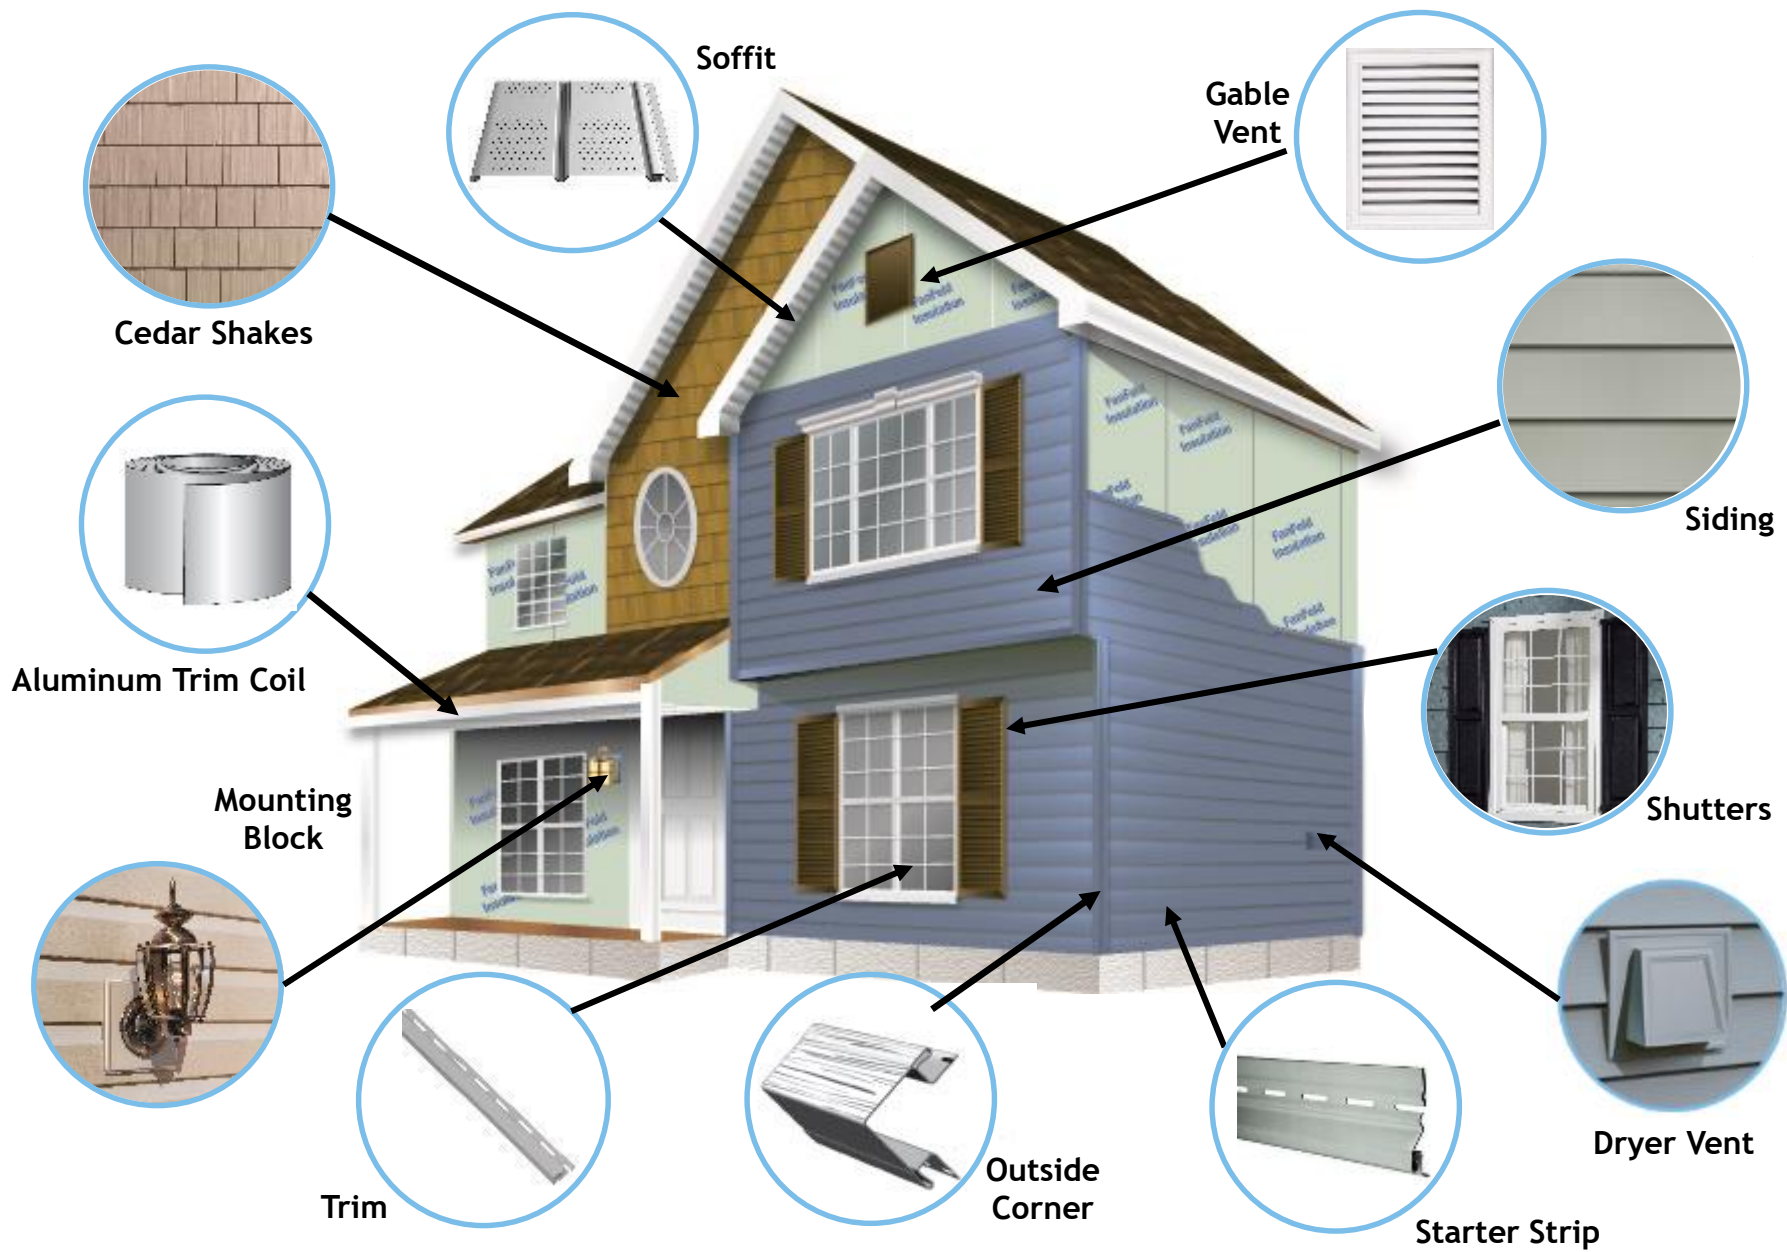

Consult the VSI website at [www.vinylsiding.org](http://www.vinylsiding.org) for a current list of certified products and colors.

# Experience Lowe's Vinyl Siding Solution

# Wall Preparation

**Before Georgia-Pacific Vinyl Siding can be installed, the first step is inspection of the current siding and wall substrate.**

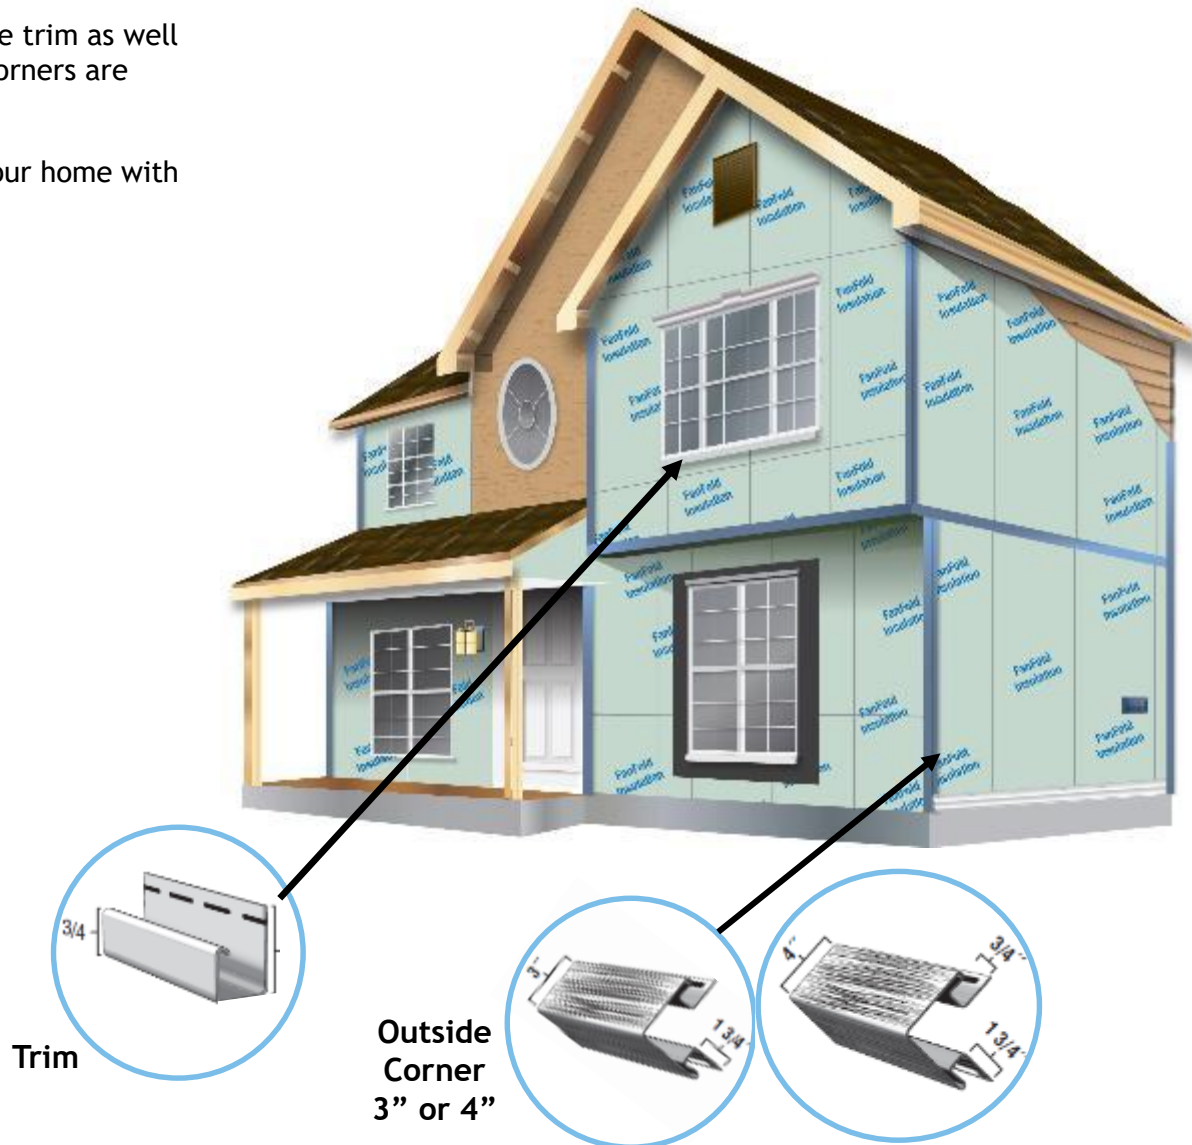

1. Depending on the condition of your wall, wall preparation may include nailing loose boards or replacing wall sheathing.
2. The next step is to install fanfold insulation or housewrap. Fanfold is used to provide a flat surface and adds an additional R-Value of 1. Uneven walls or masonry walls would require furring strips prior to installing the fanfold. If the wall preparation requires removal of siding and wall sheathing, housewrap will be applied to the wall sheathing.
3. The final step of wall preparation is applying flashing around all windows, doors and other openings as well as the outside corners and where walls and the roof intersect.

# Accessory Installation

**Your home is ready to begin installation of the accessories pieces.**

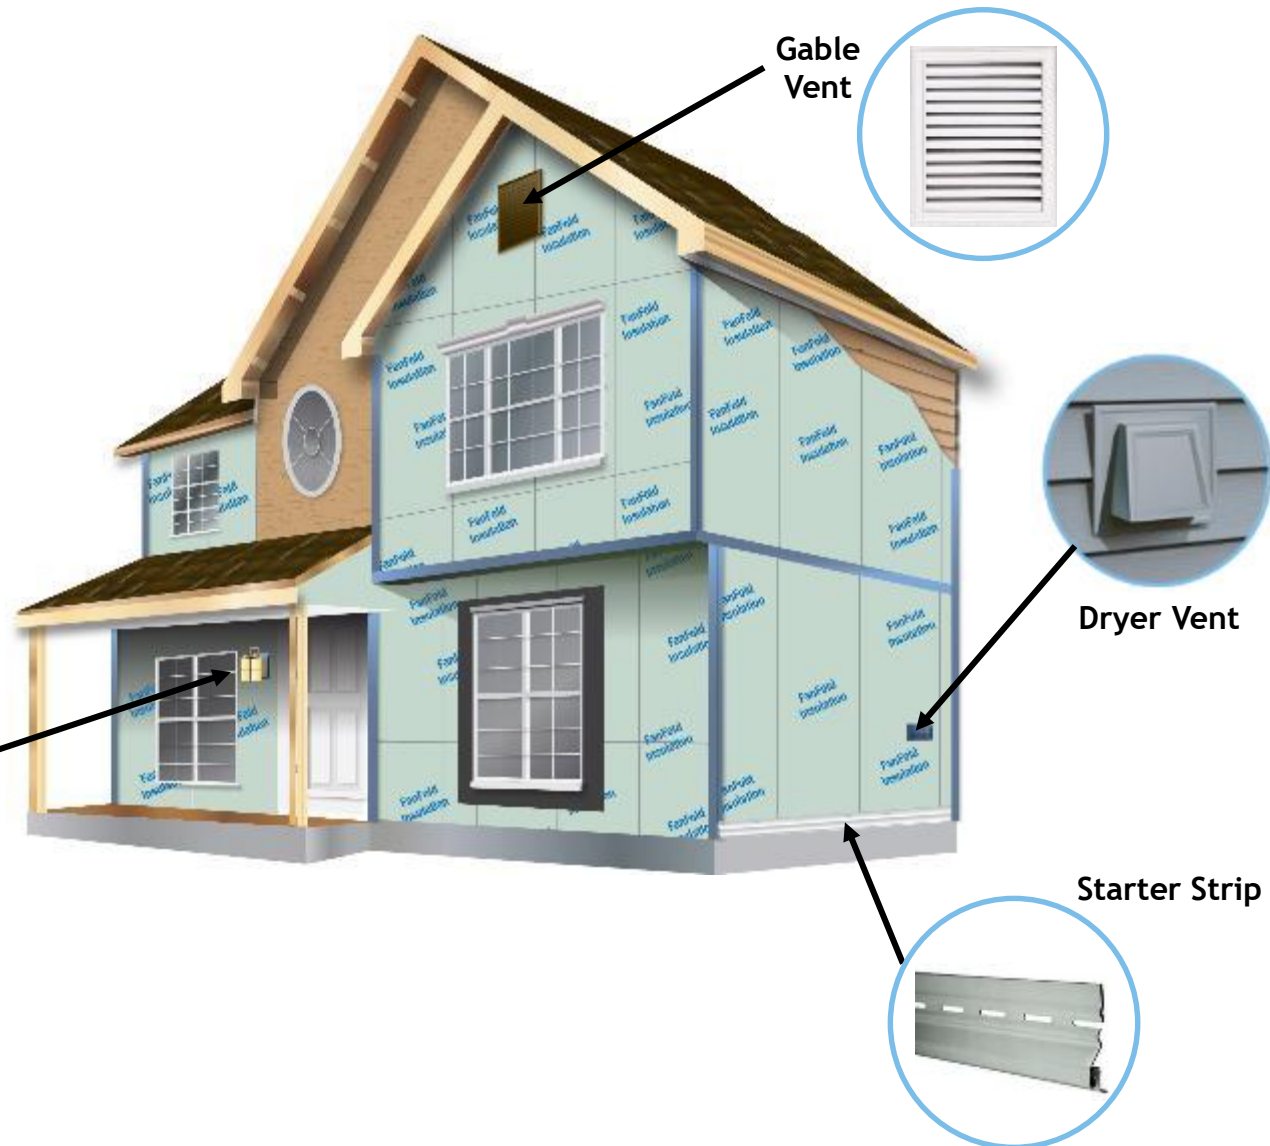

1. Window, door and gable trim as well as inside and outside corners are installed next.
2. Upgrade the look of your home with 4" Outside Corners.

# Accessory Installation

**Your home is ready to begin installation of the accessories pieces.**

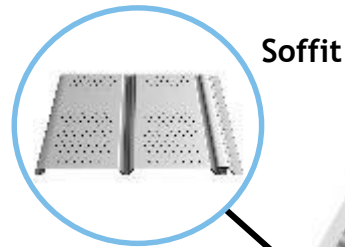

1. Color matched blocks and vents are installed. Blocks include light block, electrical block, water spigot, dryer vent and gable vents. The blocks and vents are designed with a channel to keep water from entering your home.
2. Starter strip is then installed around the perimeter of the house to ensure a level installation of the siding.

# Final Preparations

1. Once all the accessory pieces are installed, soffit panels are installed next. Soffit panels are designed with ventilation to provide proper air flow.
2. The final step before installing the siding is to wrap the fascia, posts, beams, windows and door frames with aluminum.

Soffit

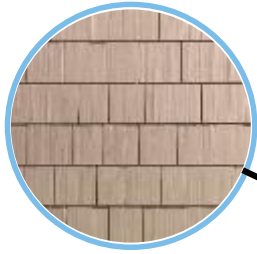

Aluminum  
Trim Coil

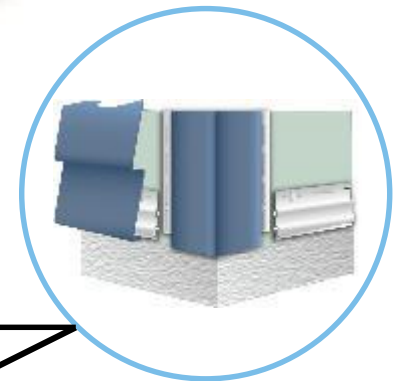

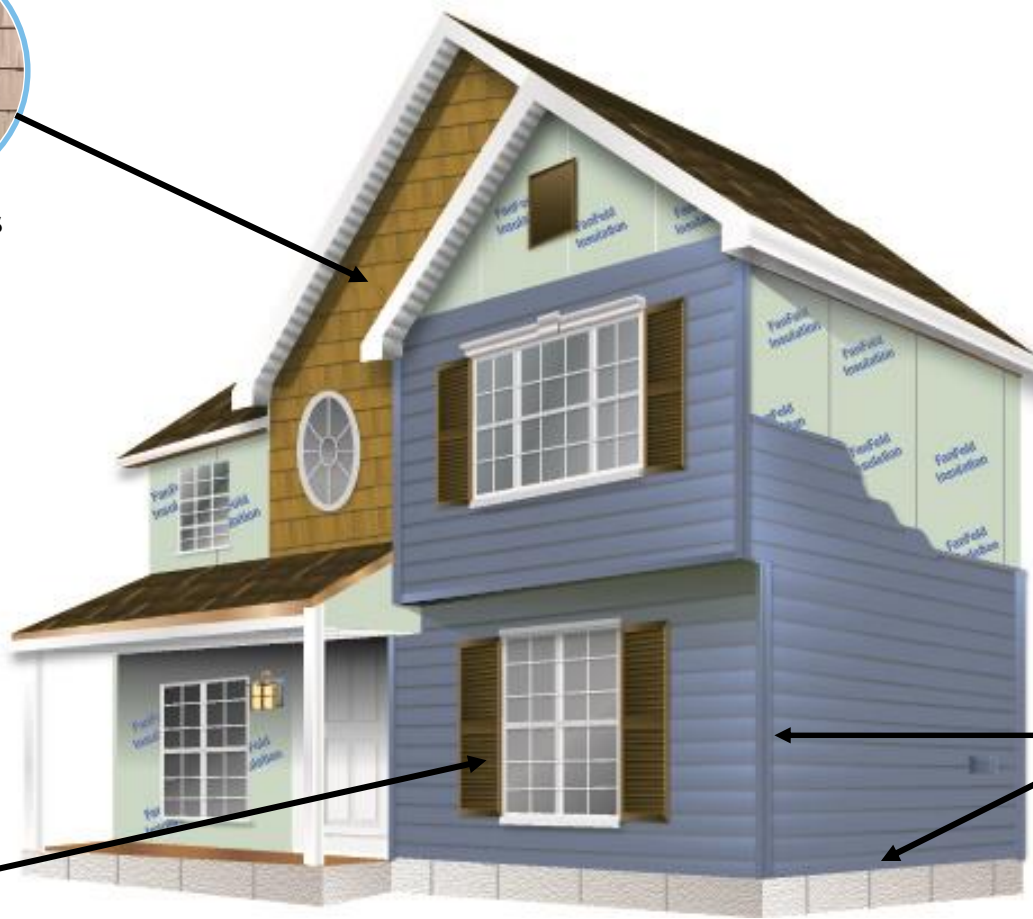

# Ready to Install Siding, Shakes & Shutters

We are now ready to install the GP Vinyl Siding you selected as well as accent products such as vinyl shakes, board and batten panels and shutters.

Cedar Shakes

Siding locks to starter strip, and slides into outside corners, and window/door channels for a finished, clean look

Shutters

**Completed Home:** You have seen how Lowe's offers a complete siding solution for your home.

## COMPASS NATURAL ELEMENTS™ COLLECTION

### Discover Your Color From A Palette Inspired by Nature

The Compass® Natural Elements™ Collection was designed around the beautiful hues that you see every day in nature. The use of these nature-inspired colors is becoming more and more prevalent as a main siding color. Mixing these more dramatic colors with different product materials, such as horizontal or vertical siding, or trim and stone, creates a dynamic style statement that will set your home apart from the rest.

- 5/8" projection for a more realistic shadow line
- Grip Tight™ locking system, coupled with a sturdy .044" panel thickness and double thickness nail hem delivers a 222 mph wind load
- Double thickness bottom lock provides greater strength and reinforcement at a critical point in the locking system
- Luran®S ASA resin used for Natural Traditions collection adds extra UV protection
- Kynar 500®--a multi-layer, weather-resistant coating keeps wood grain colors looking new
- Limited Lifetime Transferable Warranty
- Premium Colors: 25-year excessive color fade warranty
- Non-Premium Colors: 5-year excessive color fade warranty

## Beauty that's more than skin deep...

Available profiles:

Double 4" Traditional Lap

Double 4.5" Dutch Lap

- 1) Four layer attachment system snaps as it locks, helping keep panels **firmly in place**
- 2) Reverse Full Roll **double thickness nail hem** for more secure attachment and improved resistance to blow off in high wind conditions
- 3) Oversized **top lock engages more securely** and helps straighten the panels on the wall
- 4) Realistic **wood grain emboss** with a low gloss finish
- 5) Larger 5/8" projection and upward reverse butt angles help to **keep the overlapped seams tight and secure**, improving the appearance of the installation by making seams less noticeable
- 6) Double thickness bottom lock provides **greater strength and reinforcement** at a critical point in the locking system

## Premium Colors: Engineered to Last

Select Natural Elements Collection colors are protected by Luran®S ASA resin from BASF®. This added ingredient ensures that the **deep shades will hold for years of beautiful wear**, thanks to controlled engineering and production methods.

- Premium colors stay beautiful despite long-term exposure to the sun and weather
- Proprietary technology and Permahue color enhancer provide maximum color protection

## Worry-Free Woodgrains

Compass® wood grain colors employ a high-quality coating system using Kynar 500® — a multi-layer, weather-resistant, high-end coating with a proven history of unmatched protection against the damaging effects of constant UV ray exposure — along with multiple layers of cedar graining and shading for superior fade resistance, remarkable texturing and color retention.

- 25% less expensive than real cedar
- Resists cracking, splitting and shattering
- Unique colors to choose from
