COMPASS®

The Compass Difference

- 1 Four-layer attachment system snaps as it locks, helping keep panels firmly in place
- 2 Reverse Full Roll double thickness nail hem for more secure attachment and improved resistance to blow off in high wind conditions

- 3 Oversized top lock engages more securely and helps straighten the panels on the wall
- 4 Realistic wood grain emboss with a low gloss finish
- 5 Larger 5/8" projection and upward reverse butt angles help to keep the overlapped seams tight and secure, improving the appearance of the installation by making seams less noticeable
- 6 Double thickness bottom lock provides greater strength and reinforcement as a critical point in the locking system
